

CLEAN MARKER

A FLAT BRUSH FONT FAMILY

IMITATING LETTERS DRAWN BY HAND

Based on a pseudo monolinear sans serif lettering *ductus* intended for flat brush/marker usage and large drawing sizes (hand drawn posters or banners), this project was a first step into type design. *Clean Marker* finds its unicity in the drawing imperfections inherent to the tool (flat nib) in conjunction with the intent (no contrast). The broken curves are a major hint of the calligraphic construction, with the tool's angle variations. **2023**
